

ABSTRACT

The Travel Log App is a user-friendly platform designed to document, explore, and share travel experiences. It allows users to create accounts, add detailed travel logs with photos and ratings, and view logs through personalized sections like "My Trips" and "Explore." Users can bookmark favorite logs, search and filter by location or tags, and manage logs with edit/delete options. A settings page enables profile updates and account management.

An optional admin dashboard provides tools for moderating content and managing user accounts. The app fosters a community-driven space for preserving memories, discovering destinations, and inspiring future travels, making it a valuable tool for travel enthusiasts.
